Company overview

ROC Advice provides senior HSE consulting to operators and contractors across the Australian energy sector. We work alongside client teams on the critical risks and the controls that must hold, from planning and documentation through to verification at the workplace. Work is scoped, priced and delivered by the same person, under your systems and permit to work.

Core capabilities

Scoped HSE consulting

- HAZID and bowtie facilitation
- Critical control frameworks
- Independent HSE system audits
- Safety system design and development
- HSE plans, bridging documents, safety case input
- Tender and regulatory HSE submissions
- Contractor prequalification and assurance
- ICAM investigations
- Supervisor and safety leadership training

Embedded HSE support

- Shutdowns and turnarounds
- Drilling campaigns and mobilisation
- Construction and commissioning
- Leave cover and surge support
- Risk review before mobilisation
- Daily field presence, permit and JSA reviews
- Critical controls verified at the workplace
- Behavioural safety and human factors
- HSE reporting and campaign close-out

AI for HSE

AI tools tailored to each HSE team and tested on their own documents, with clear use rules. AI drafts and sorts; a competent person decides. Includes OnePack for contractor prequalification.

Past performance

LNG shutdown HAZID. 120+ hazards identified; bowtie barriers mapped for 8 major accident events.

Otway offshore exploration. NOPSEMA compliance held; program delivered on schedule in Bass Strait.

Pipeline commissioning. Regulatory hold points cleared across 3 jurisdictions, no major incidents.

QLD CSG drilling contractor. HSE management system built from scratch; mobilised on schedule.

Clients include ConocoPhillips, Santos, Origin Energy, Epic Energy, Savanna Energy and Drillsearch.

WHY ROC ADVICE

- Senior, field-based HSE: the person who scopes the work delivers it
- Focused on critical risks and controls proved in the field, not paperwork
- Simple, risk-based systems crews actually use
- Start small and stop after any step: fixed-price diagnostic first
